Chapter 1

Data Structure Index

1.1 Data Structures

Here are the data structures with brief descriptions:

myStructType	5
struct1	My structure definition	5
struct2	6

Chapter 2

File Index

2.1 File List

Here is a list of all files with brief descriptions:

test-input-function-params.ipf	7
test-input.ipf	8

Chapter 3

Data Structure Documentation

3.1 myStructType Struct Reference

Data Fields

- variable [v1](#)

3.1.1 Detailed Description

Definition at line 11 of file test-input-function-params.ipf.

3.1.2 Field Documentation

3.1.2.1 variable myStructType::v1

Definition at line 11 of file test-input-function-params.ipf.

The documentation for this struct was generated from the following file:

- [test-input-function-params.ipf](#)

3.2 struct1 Struct Reference

My structure definition.

Data Fields

- string [str](#)
- variable [var](#)

3.2.1 Detailed Description

My structure definition.

Definition at line 55 of file test-input.ipf.

3.2.2 Field Documentation

3.2.2.1 string struct1::str

Definition at line 55 of file test-input.ipf.

3.2.2.2 variable struct1::var

Definition at line 57 of file test-input.ipf.

The documentation for this struct was generated from the following file:

- [test-input.ipf](#)

3.3 struct2 Struct Reference

Data Fields

- string [str](#)
- variable [var](#)

3.3.1 Detailed Description

Definition at line 60 of file test-input.ipf.

3.3.2 Field Documentation

3.3.2.1 string struct2::str

Definition at line 60 of file test-input.ipf.

3.3.2.2 variable struct2::var

Definition at line 62 of file test-input.ipf.

The documentation for this struct was generated from the following file:

- [test-input.ipf](#)

Chapter 4

File Documentation

4.1 test-input-function-params.ipf File Reference

Data Structures

- struct [myStructType](#)

Functions

- variable [myFuncParam1](#) (variable *var1*)
- variable [myFuncParam2](#) (variable *var1*, string *str1*)
- variable [myFuncParam3](#) (wave/t *w1*, string *str1*, [myStructType](#) **myStruct1*, [myStructType](#) **myStruct2*, [myStructType](#) **myStruct3*)
- variable [myFuncParam4](#) ([myStructType](#) **param*)
- variable [myFuncParam5](#) ([myStructType](#) **param*, string **str1*=defaultValue)

4.1.1 Function Documentation

4.1.1.1 variable [myFuncParam1](#) (variable *var1*)

Definition at line 2 of file test-input-function-params.ipf.

4.1.1.2 variable [myFuncParam2](#) (variable *var1*, string *str1*)

Definition at line 6 of file test-input-function-params.ipf.

4.1.1.3 variable [myFuncParam3](#) (wave/t *w1*, string *str1*, [myStructType](#) * *myStruct1*, [myStructType](#) * *myStruct2*, [myStructType](#) * *myStruct3*)

This function has structure parameters, which are always call-by-reference

Parameters

<i>w1</i>	input wave
<i>str1</i>	fancy version string

<i>myStruct1</i>	first working struct
<i>myStruct2</i>	second working struct
<i>myStruct3</i>	third working struct

Definition at line 21 of file test-input-function-params.ipf.

4.1.1.4 variable myFuncParam4 (myStructType * param)

Definition at line 29 of file test-input-function-params.ipf.

4.1.1.5 variable myFuncParam5 (myStructType * param, string * str1 = defaultValue)

Definition at line 34 of file test-input-function-params.ipf.

4.2 test-input.ipf File Reference

Data Structures

- struct [struct1](#)
My structure definition.
- struct [struct2](#)

Functions

- static variable [FooBarStatic](#) ()
- static threadsafe variable [FooBarStaticThreadsafe](#) ()
- threadsafe variable [FooBarThread](#) ()

Functions with different return types

- variable [FooBar](#) ()
- variable [FooBarSubType](#) ()
- variable [FooBarVar](#) ()
- dfr [FooBarDFR](#) ()
- complex [FooBarComp](#) ()
- string [FooBarStr](#) ()
- wave [FooBarWave](#) ()

Variables

- const variable [myConst](#) =123
This is a really special number.
- const string [myStrConst](#) ="abcd"
The first alphabet letters.

4.2.1 Function Documentation

4.2.1.1 variable FooBar ()

Definition at line 9 of file test-input.ipf.

4.2.1.2 complex FooBarComp ()

Definition at line 28 of file test-input.ipf.

4.2.1.3 dfr FooBarDFR ()

Definition at line 24 of file test-input.ipf.

4.2.1.4 static variable FooBarStatic () [static]

Definition at line 42 of file test-input.ipf.

4.2.1.5 static threadsafe variable FooBarStaticThreadsafe () [static]

Definition at line 46 of file test-input.ipf.

4.2.1.6 string FooBarStr ()

Definition at line 32 of file test-input.ipf.

4.2.1.7 variable FooBarSubType ()

Function with subtype

The subtype is currently ignored

Definition at line 16 of file test-input.ipf.

4.2.1.8 threadsafe variable FooBarThread ()

Definition at line 50 of file test-input.ipf.

4.2.1.9 variable FooBarVar ()

Definition at line 20 of file test-input.ipf.

4.2.1.10 wave FooBarWave ()

Definition at line 36 of file test-input.ipf.

4.2.2 Variable Documentation

4.2.2.1 const variable myConst =123

This is a really special number.

Definition at line 2 of file test-input.ipf.

4.2.2.2 const string myStrConst ="abcd"

The first alphabet letters.

Definition at line 5 of file test-input.ipf.
